Senior Conservation Employment Program

What is the Senior Conservation Employment Program?

The Forest Service's participation in the Senior Community Service Employment Program, administered under Title V of the Older Americans Act, is commonly known as the Senior Conservation Employment Program. It is a cooperative program with the Department of Labor for economically disadvantaged senior citizens, primarily in rural areas. The main benefits derived from the program by enrollees are a supplemental income, work experience, and training. Enrollees also receive personal and job-related counseling, supervision, yearly physical examinations, and in some cases, placement in regular unsubsidized jobs. In return, valuable conservation projects are completed on National Forest lands.

Who is eligible?

Prospective enrollees must be:

- At least 55 years old.
- Economically disadvantaged at the time of enrollment. Enrollees must qualify under the low income eligibility guidelines established by the Labor Department's Employment and Training Administration.

What are its objectives?

The Senior Conservation Employment Program seeks to provide a supplemental income to seniors; demonstrate and utilize the potentially great value of seniors to society in general . . . and to rural communities in particular; and provide work experience that will encourage and help rural employers to hire more senior workers.

Wages?

Enrollees receive at least the Federal or State minimum wage, whichever is higher. Enrollees may receive higher rates of pay for performing additional duties of supervision or skilled labor.

Types of work?

Projects provide work experience in, but not limited to: construction, rehabilitation, and maintenance of recreation areas; improvement and maintenance of trails; improvement of timber stands; wildlife habitat improvement; other resource improvement work on National Forest lands; and clerical support.

How to apply?

Individuals who meet the basic eligibility requirements and desire information on how to apply for enrollment in the program should write to the nearest office of the **Forest Service, U.S. Dept. of Agriculture** listed below.
